

## **On the Orientation of Megalithic Tombs in Northern Germany**

ANDREAS HÄNEL<sup>1</sup>

<sup>1</sup>Museum am Schölerberg, Am Schölerberg 8, D-49082 Osnabrück  
ahaenel@uos.de

Orientations of the entrances of megalithic tombs in North Germany and The Netherlands have been measured and discussed by Hänel (2005). Meanwhile more orientations in Schleswig-Holstein, the North-East of Niedersachsen (Lower Saxony), the Altmark and the Haldenslebener Forst have been added and give a more complete picture for the orientations of these tombs in Northern Germany.

Hänel, A.: Were megalithic tombs solar observatories? In: Wittmann, A. D. u. a. (ed.): Development of Solar Research. Frankfurt: Harri Deutsch (Acta Historica Astronomiae; 25) 2005, p. 13–26.
